

Nitrogen 40% , K2O 1%, Bioactive Sulfur 7%
 A synergetic combination of Urea (Nitrogen),
 Potassium, Bio Active Sulfur,
 Nutrient Solubilizing Microorganisms (NSM)
 & Plant Growth Regulating Microorganisms (PGRM)
 with Organic Coating

Benefit of urea S

- Health & vigorous root system due to PGRM
- Lush green and larger leaves due to Sulfur supplement
- Larger and heavier seed due to Sulfur
- Bio Active Sulfur reduces soil born diseases
- Healthy crop and more yield
- Crop remain green till ripening due to PGRM
- Sulfur & Organic coating gives less Nitrogen leaching and volatilization
- Free sowing no lumps & powder

Features of urea S

- A novel product of Niha Corp Patent Bio Activation Technology
- Eco Friendly comparative to H2SO4
- Bio Active Sulfur, Nitrogen (Urea), NSM and PGRM in one granule
- Best suited for Alkaline & salt affected soil
- Ultimate acidic effect on soil

General Dose Recommendation (Kg/Hect)

Crop	after Urea Z application
Wheat, Rice & Cotton	125-150
Maize, Potato	375-400
Sugar Cane	375-400

These are general recommendation. For best results apply Urea S after irrigation in moist soil conditions
